

Spending Money and Making Choices

You are off to the grocery store with your mom! She says, "Today, just this once, I am going to give you \$10.00 to spend on any goodies you would like. Choose wisely because you only have \$10.00, not a penny more!"

So, now you are on a mission to decide what to purchase with your \$10.00.

Here are your choices of goodies to select.

Price: \$3.35

Price: \$2.88

Price: \$4.50

Price: \$2.70

Price: \$4.75

Price: \$4.55

Price: \$2.99

Price: \$3.78

Price: \$4.18

1. At first, you are thinking about buying Oreos. Describe one way you could make the amount that Oreos are worth with coins and dollars.
2. Which 2 items are you most interested in buying? How much do they cost together? Do you have enough money for them?
3. You are thinking about buying Cheez-Its and Gushers. Do you have enough money for both of these?
4. Okay, now that you have thought about it for a little bit, what are you going to buy with your \$10.00? How much do your items add up to?
5. How much money do you have left over? Is there anything else you can buy?
6. Is it possible to buy 3 items? If yes, which 3 items can you buy that add up to \$10.00 or less?
